

WHAT WORKS EVIDENCE ACCELERATORS

The MCH Evidence Center has identified the latest strategies and practices as potential approaches for advancing each of the National Performance Measure (NPM) and Standardized Measure (SM) topic areas. These Accelerators provide a framework to identify, understand, and implement “what works” in creating new or strengthening current ESMS.

“These resources were immediately impactful in helping our team think through our workplan and current ESMS.”

-- MCH Professional,
California

Each accelerator includes:

- An overview with data sources and highlighted national statistics
- Approaches that work to advance health outcomes for all MCH populations
- Ideas for partnership and the role of Title V for each measure
- Evidence-based/informed strategies from the MCHbest database
- State-based programs from AMCHP's Innovation Hub
- Key findings, resources, sample ESMS and more!
